IS THE ELEMENT WE DRINK DECIMATING THE PEOPLE? BOUND How a Universal Menace to Health May Be Disarmed.

The filling up of the old well stopped the ravages of the disease.

Not long since the writer noticed while ome men were making an excavation been tainied with the drainings from a had discolored the earth! Terrible!

A similar condition of things exists in every village and city where well water is used, and though the filtering which the fluids receive in passing through the earth may give them a clear appearance, vet the poison and disease remains, clear.
It is still worse with the farmer, for

the drainage from the barn-yard and the slops from the kitchen eventually find their way into the family well!

'water" is eventually drunk by rich and poor alike with great evil. Some cautious people resort to the filter for purifying this water, but even the

must be renewed at regular periods, for even though they do not take out all the impurity, they soon become foul. Now in like manner the human kid-

seys act as a filter for the blood, and if bey are filled up with impurities and become foul, like the filter, all the blood in the system coursing through them be-comes bad, for it is now a conceded fact that the kidneys are the chief means whereby the blood is purified. These organs are filled with thousands of hairlike tubes which drain the impurities from the blood, as the sewer pipes drain mpurities from our houses.

If a sewer pipe breaks under the house,

the sewage escapes into the earth and fills the house with poisonous gas; so if any of the thousand and one little hair-like sawer tubes of the kidneys break down, the entire body is affected by this

the Colorado, 18 miles. Via Kingman, dally stages to Stockto Hill, 10 miles; Maneral Park, 16 miles; Cer It is a scientific fact that the kidneys organs for a long time and not be sus-pected by the individual.
